sakshi.garg9999@gmail.com | +91-9667116757 | Gurgaon, India

PROFESSIONAL SUMMARY

Results-driven Senior QA Automation Engineer with 8.5+ years of experience in software testing across Finance, Data Integration, and Networking domains. Proven expertise in designing and implementing Selenium WebDriver and API automation frameworks using Java, Groovy, and ReadyAPI/SoapUI. Adept at Agile and Waterfall methodologies, cross-functional collaboration, and delivering quality releases under tight timelines. Recognized twice as Star Performer of the Account.

PROFESSIONAL EXPERIENCE

Senior Consultant – QA Automation | Capgemini, Gurgaon

Oct 2023 – Present | Networking Security Project | Team Size: 10

- Designed and implemented data-driven regression testing framework using Selenium WebDriver with Java in IntelliJ IDE, applying Page Object Model (POM) with Page Factory for smoke testing.
- Authored and executed automated test scripts in Jenkins CI/CD pipelines, reducing manual testing effort.
- Managed test design and task tracking in JIRA and TestRail; defined project timelines using BigPicture.

Senior Test Engineer – QA Automation | HCL Technologies, Noida

Jan 2022 – Sep 2023 | Outbound Data Migration System | Team Size: 8

- Created and executed automated API test scripts in ReadyAPI integrated with QTest framework across multiple test environments.
- Performed functional testing (Smoke + Regression), Integration testing, and Database testing end-to-end.
- Handled multiple releases single-handedly under strict deadlines; logged and tracked defects in JIRA.

Associate QA L2 – Automation Engineer | Sapient Global Markets, Gurgaon

Aug 2017 – Dec 2021 | Data Integration Project | Team Size: 12

- Built automated Web Service, Regression, and Smoke test suites using SoapUI (Groovy scripting) and Selenium WebDriver with Java.
- Developed high-level data-driven framework with POM/Page Factory design pattern; executed scripts in Selenium environment.
- Created test cases in TestNG framework; handled multiple test tracks independently.
- Automated full test suite for an internal web application using Selenium, TestNG, and Maven, eliminating test dependencies.

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, SoapUI/ReadyAPI, Postman, Cucumber/BDD

Programming & Scripting: Java, Groovy Script, SQL

Frameworks: TestNG, Page Object Model (POM), Page Factory, Data-Driven Framework

CI/CD & DevOps: Jenkins, GitHub, SVN, Maven

Test Management: JIRA, QC/ALM, QTest, TestRail, BigPicture

Databases: SQL Server 2008, Oracle SQL Developer, PostgreSQL

IDEs & Platforms: Eclipse, IntelliJ IDEA, Windows

Methodologies: Agile (Scrum), Waterfall, SDLC

EDUCATION

B.Tech, Computer Science | TIT&S; Bhiwani, MDU | 2013–2017 | 79%

12th, CBSE | K.M. Public School, Bhiwani | 94%

ACHIEVEMENTS

- Recognized twice as **Star Performer of the Account** at Sapient Global Markets.
- Ranked in **Top 5** out of entire training cohort at Sapient.
- Led technical recruitment team and organized team-building activities; Head of Fundroid Team.
